

PELI™ AIR

IS THAT ALL YOU HAVE?

With over 33 cm of depth, our new Peli Air cases have room for your deeper shaped equipment, like drones and cinema-grade cameras, and they're still up to 40% lighter than other polymer cases. For ultimate organisation choose the multi-layer* padded divider system with a top tray for smaller gear, and a bottom section for larger and heavier equipment. Need even more space? Try our premium TrekPak™ system. Slim, yet tough corrugated sections that are customisable for a precise fit.

Peli. Built to Protect.

TrekPak™ Configuration

Padded Dividers
Optional Configuration

* multi-layer dividers on
1607 and 1637 only

CONFIGURATIONS

No Foam

This configuration is your blank canvas. You can use the case empty, or acquire any of the following inserts as an accessory: Pick N' Pluck™ foam, padded dividers or TrekPak™ dividers.

Pick N' Pluck™

Classic Pick N' Pluck™ foam is the answer for fast and simple protection. Just pluck the pre-scored foam to fit your equipment.

Padded Dividers

The professional protection solution. Versatile and durable, padded dividers with Velcro™ straps easily adjust to fit your equipment.

TrekPak™

The TrekPak™ kit is a versatile divider system that allows you to organise your case like a professional. Durable, closed-cell foam is laminated to corrugated panels that provide a precise grid of protection without wasting space.

(not available on 1607 and 1637)

PELI™ AIR CASES

NEW DEEP SIZES

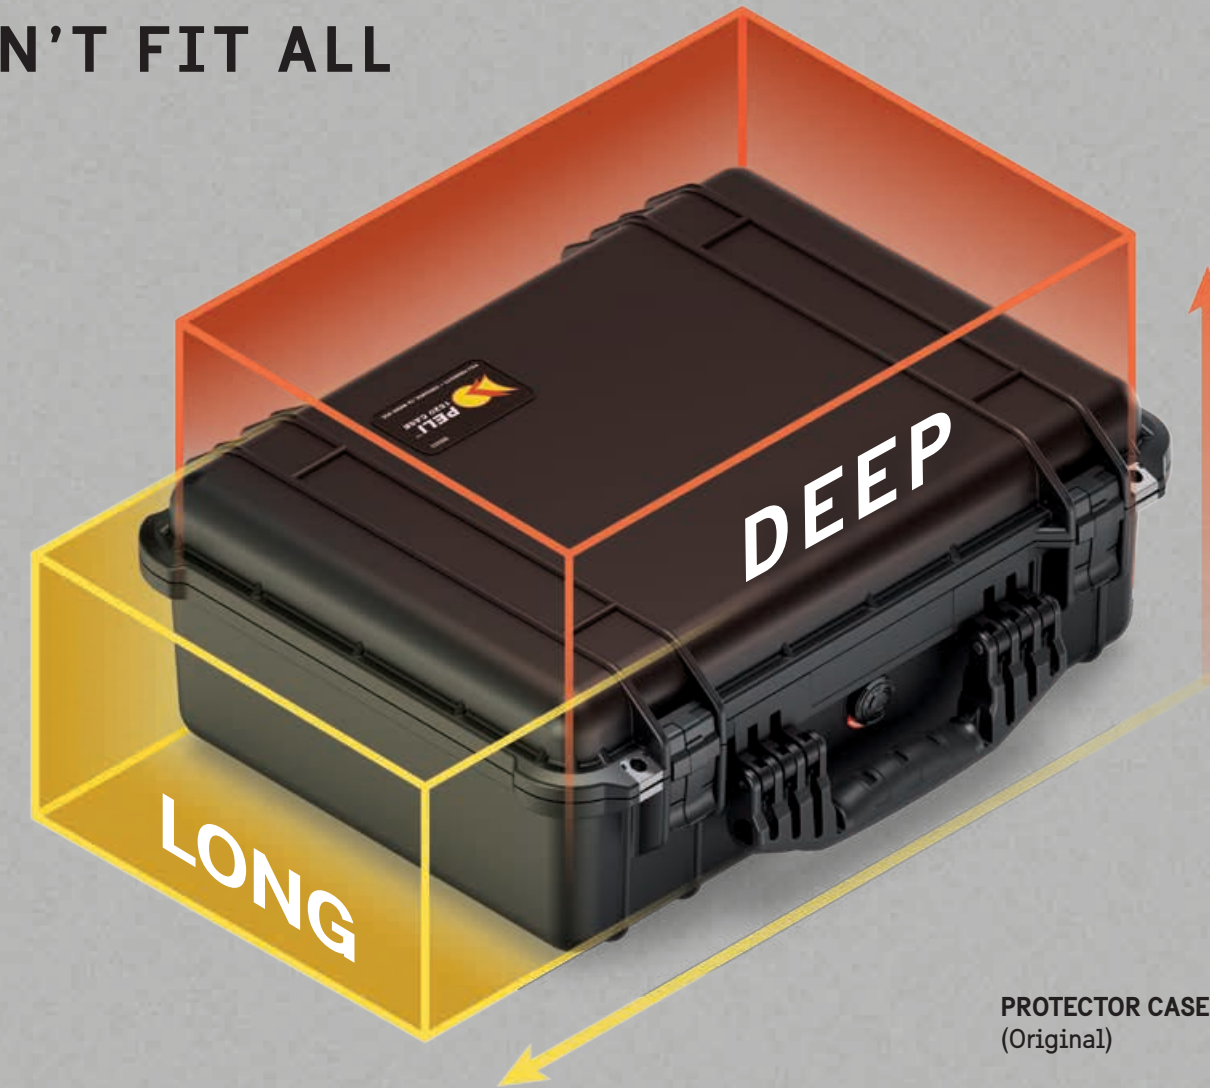

SINCE 1976

45% DEEPER. 40% LIGHTER.

ONE SIZE DOESN'T FIT ALL

LOSE UP TO 40% MORE WEIGHT

THE SCIENCE BEHIND STRENGTH AND LIGHTNESS

The Peli™ Air case has been designed to cut weight without compromising durability.

Our engineers have revolutionised the protector case by reducing structural waste while preserving Peli's legendary standards of strength. Here are some important reasons why Peli Air cases are both strong and light:

- Moulded from the next generation of Peli's lightweight HPX™ resin, a proprietary formula that rebounds without breaking
- Honeycomb structural elements that are actually stronger than solid polymer material
- Super-stiff "full box" sections engineered to create hollow parts

UP TO THE TEST

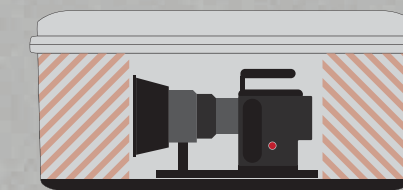

It wouldn't be a Peli™ case if you couldn't sink it, drop it, or kick it – and the Peli™ Air case is no different.

- Drop-tested on concrete with loads from 1,8 m on all sides and corners
- Submerged for 30 minutes at a depth of one meter
- Wheels are roll tested over 1 km.
- 28 lb. (12.7 kg) steel dart dropped on all sides from one meter

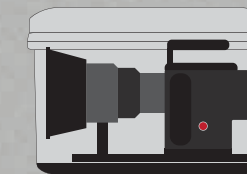

PELI™ AIR

THEY GREW FROM THE PROTECTOR CASE

Since 1976 our original Peli™ Protector™ Case line has grown to over 60 unique sizes, but that is still not enough. Peli™ Air cases offer both long or deep variations you won't find in our Peli Protector Case line. Now you can get the perfect fit.

WASTED SPACE

PERFECT FIT

WE WENT LONG, NOW WE'RE GOING DEEP

We've complimented our long cases with three new deep case designs that are 45% deeper and 40% lighter. Now you can protect more gear without breaking a sweat.
