PELI CASES FEATURES

Rugged, uncompromising and trusted, Peli cases protect what matters to you, from the everyday to the extraordinary. Peli Protector Cases are made with copolymer polypropylene and cutting edge technology, which makes them virtually indestructible and resistant to the most extreme conditions. Proven for over 45 years in the most demanding environments. Engineered and manufactured in the U.S and in Germany. Guaranteed for Life and sustainable due to its long life.

+ STRONGER BY DESIGN

The Peli Protector Case™ uses an open cell core and solid wall construction, which is actually stronger and lighter than a solid core wall. Travel light with heavy protection. And you know it's a Peli™ Case by the distinctive dual band top surface. Stainless steel pins are used for hinges and handles. The Double-Throw latches are smarter and easier to open: it's the classic 'C' clamp design with a secondary movement that works like a pry bar to start the release and offers plenty of leverage to open with a light pull.

+ EASY RIDING

Stainless steel ball bearing wheels (on selected cases) last longer and ride smoother. The nylon hub adjacent to the stainless steel resists heat. Result: less wear and tear on the polyurethane tire.

1. NYLON HUB
2. STAINLESS STEEL BALL BEARING WHEELS
3. POLYURETHANE TIRE

+ EXTRA PROTECTION

Peli's Pick N Pluck™ foam lets you customise the interior according to your gear. An easy, do-it-yourself system: layers of foam are pre-scored in tiny cubes. Simply measure your equipment over the grid and pluck away.

+ TESTED

The Peli™ Case design is the result of multiple generations of refinement. This evolution is proven through a battery of rigorous lab tests including drop, vibration, leak, heat and dust tests.

+ REINFORCED PADLOCK PROTECTORS

Stainless steel reinforced padlock protectors provide added strength and extra security against cutting and theft.

+ WATERTIGHT

The secret is the tongue and groove fit with a polymer o-ring acting as a waterproof seal.

+ COOL UNDER PRESSURE

The Automatic Pressure Equalisation Valve releases built-up air pressure while keeping water molecules out, resulting in a watertight case that is even easier to open.

PELI CASE INTERIOR PROTECTION

Peli™ Cases are available empty or with any of the following protection solutions.

Check how to install all accessories through our easy step-by-step Tutorial videos

+ PICK N PLUCK™ FOAM

An easy, do-it-yourself system for the interior of the case. Layers of foam are pre-scored in 1,27 cm or 2,54 cm cubes. Simply lay your equipment on the foam, tape or chalk to mark the foam, and pluck away. Always allow at least 2,5 cm of foam between your equipment and the case wall.

The following cases ship with solid foam instead of Pick N Pluck™ Foam: 1700, 1720, 1750

+ TREKPAK™ DIVIDERS*

The TrekPak™ system uses pre-installed wall sections, divider panels, locking pins and an infallible cutting tool. Just lay your gear in the case, measure and cut the divider sections and lock them in place with the steel U-pins.

* Trekpak™ is available for the following models: 1450, 1500, 1510, 1550, 1560, 1600, 1610, 1650.

+ CUSTOM FOAM SOLUTIONS

Custom foam and extreme solutions such as deck mount suspension systems will keep your delicate items protected on the inside.

+ PANEL FRAMES

Many Peli™ cases can be adapted for use with electronic interface panels by using a Panel Frame. Pre-drilled holes and stainless steel screws make fabricating a custom case a fast and accurate proposition.

A polymer o-ring seals the panel so the base of the case remains watertight, even with the lid open.

The following cases are adaptable for use with panel frames: 1120, 1150, 1200, 1300, 1400, 1430, 1450, 1470, 1490, 1500, 1520, 1550 (search for the icon)

+ EZ-CLICK™ MOLLE PANEL

NEW

The first lid organiser of its kind that can quickly be released and swapped out without tools. Engineered to fit in the 1510 and 1560 Peli cases, the panel is compatible with user-supplied MOLLE pouches and Velcro™ brand straps.

+ ELECTRONIC INSTALLATIONS

Peli™ Case allows customisation for electronics. The copolymer material can be machined, drilled and sanded smooth. This makes the Peli™ Case suitable for use with bulkhead connectors.

+ PADDED DIVIDERS

An alternative to Peli™ foam is our optional Padded Divider Sets. The compartments are connected with Velcro® so you can easily change the configuration according to your needs.

+ HYBRID PROTECTION

No longer choose between the versatility of the TrekPak™ divider system or the protection of the manually customisable Pick N Pluck™ foam. Peli™ Air Hybrid protection features both. Only available for the Peli™ 1510 case as a standard offering.

+ WE CUSTOMISE YOUR LOGO

Personalise your case with your company logo or have your name engraved on the nameplate. Logos can be applied in multiple colours as a Mylar® decal or as a vibrant fade-resistant, scratch-resistant hot-stamped ink.

CRUSHED ICE OPTIONAL

SURVIVAL
+ STORIES

We chose the best gear that we could get our hands on, including Peli™ boxes to safeguard our camera gear, radios and satellite telephone. At 81° North latitude, one of our plastic kayaks, with a Peli™ box mounted on deck, became caught in the current-driven ice pack and was thoroughly steamrolled. Many items loaded inside the kayak were crushed, but the Peli™ deck box emerged through it all unscathed.

SURVIVAL + STORIES

INTACT AFTER MASSIVE EXPLOSION

My team and I were first responders to a terrorist attack on a hotel in Islamabad, Pakistan. As part of our recovery effort at the blast site, we 'repatriated' one of our armored vehicles. Inside the vehicle, which was in the immediate impact zone of the SVBIED, we discovered an unscathed 'Model 1640 Peli Transport Case™.' The case stood up against a massive explosion and flying shrapnel. Seeing how well this product withstood this type of abuse, I can say that you have found yourself several new lifetime customers!

US Federal Agent

SUPERSTORM PROOF

The plane hit with such force that it sheared the left wing and float right off and, as the plane rapidly sunk, everyone was able to escape out the exits. For over nine hours, the plane was submerged some 6-8 feet under water, loosely held to the right pontoon! When we were finally allowed to recover our gear, I was planning for the worst, because the water damage on impact had destroyed just about everyone's gear. But when I opened the lid on my Peli™ 1650 case, I was astonished to find that there was very little water inside and everything was intact!

STUCK IN THE MUD?

SURVIVAL + STORIES

During our trip across the Saharan Desert on our Africa Twin motorcycles, we went through a lot, traveling through sand, mud and water as well as over rock and asphalt. At one point, we attempted to cross a massive pool of mud that was blocking the road. The thinking was that going through at full speed would allow us to fly across the muddy area to the other side unscathed. Needless to say, that didn't happen. The bike was stuck for hours, but ultimately, we got it out. Later, we opened our Peli cases to find that the drone, sleeping bag, spare motor parts, food and clothes inside the cases remained perfectly dry and protected. There was never a doubt in our minds.
