ProGear for professionals, runs all day for when the shift feels that long

With a variety of uses in mind, *Pelican's* ProGear 2380R rechargeable LED flashlight weighs 6.6 ounces with batteries and provides extreme versatility. Using Fraen dual reflector optics its Slide-Beam technology provides a spot to flood beam instantly. The flashlight is the perfect compact lighting solution for a wide variety of users including law enforcement, military and outdoor enthusiasts. With three modes: high

(305 lumens, 35 hours), low (30 lumens, 25 hours) and strobe, it is powered by a lightweight and efficient rechargeable lithium ion battery. A battery canister is included that will accept two disposable CR123 lithium batteries to allow for alternative or extended use, and includes a micro-USB charging cable. The Type II Hard Anodized aluminum construction makes it extremely durable and the anti-slip knurled pattern allows for all-weather usage.
