IMPORTANT WARNING!

It is critical that the Pelican™ Cargo Mounts and Cases be properly installed and securely attached to your vehicle. Failure to properly secure the mounts and cases to your vehicle could result in serious injury and even death. You are responsible for the fitment of the mounts and Cargo Cases to your vehicle. You must therefore periodically inspect the equipment for wear and damage. Replace if in doubt. If you have limited mechanical experience you should not attempt to install the equipment. You should have the equipment installed by a professional installer if you have any doubts about your abilities.

It is imperative that the user check the security of the cases to the vehicle after an initial brief period of driving and adjust if required. Pelican recommends the user do so periodically and, if road conditions change (i.e. freeway to dirt road) again check the security of the attachment of the Case to the vehicle.

LATCHES AND MOUNTING KIT CARE

Periodically check the latches and mounting hardware to ensure there are no loose parts. Continual exposure to daylight may cause the black hardware finish to dull. To maintain the gloss finish, occasionally apply a light coat of UV protectant. After exposure to salty coastal climates or snowy regions, rinse off the mounts with water to remove salt deposits. To help prevent corrosion, apply a silicone-based oil or spray to nuts and bolts.
