Peli™ 1040 and 1050 Micro Case Phase Out

We are announcing the planned phase-out of the 1040 and 1050 Micro Case models as we continue to optimise our CASES portfolio and transition towards next-generation solutions. Final production is scheduled for December 2026, with both models officially being discontinued effective **1 February 2027**. To ensure a smooth transition, please begin working with your customers to identify upcoming requirements and plan for the transition to the M40 and M50 cases, which are the recommended replacements.

Below is the list of affected SKUs:
